

## MADE TO ORDER JACKET SIZING GUIDE

Actual body chest, waist/stomach and seat measurements are useful to confirm your size but lengths measured from your body can be unreliable, so we recommend measuring a jacket that fits you well, as pictured below. You can then check these measurements on the garment measurements chart to find your size.

Measure your jacket or coat laid flat. Please measure the across the chest and waist from edge of cloth to edge of cloth. For the sleeve and back length measurements you can hang the jacket on a hanger.

For Waistcoats, Trousers and Breeks. Please see the garment measurements and photo guides for each item and enter the measurements required into the order form.

**PLEASE CONTACT US IF YOU NEED ANY ASSISTANCE**

### GARMENT MEASUREMENTS

A. Garment Across Chest	
B. Garment Across Waist	
C. Sleeve Length Garment Shoulder Seam to Cuff	
D. Garment Back Length from Collar Seam	
E. Garment Across Shoulders	

### BODY MEASUREMENTS (optional)

Measure all the way round your body circumference, taken in shirt and trousers.

Chest (this should be around the chest, just below the armpit at largest part)	
Waist/Stomach (at jacket waist level, just below rib cage at largest part)	
Seat (at largest part)	

Please have these measurements ready when placing your order online.
